

Creating the Virtual Enterprise

Wayne Venter

Market Trends

- VoIP and IP Telephony are a given
- Voice is becoming an application on the data network
- SIP based multimedia collaboration is enabling people to connect and collaborate anywhere
- Communications are being integrated into business applications and workflow process rules

Delivering Business Value

Source: Yankee Group 2003

Evolution of business relationship

Silos	Linked	Integrated	Engaged
			
Focus: Cost Containment, Independent Transactions	Focus: Customer Service, Information sharing	Focus: Customer Loyalty, Personalization	Focus: Customer Development, Anticipating needs
Success Metric: Operational Statistics	Success Metric: Customer Satisfaction	Success Metric: Revenue/Profit by Customer	Success Metric: Return on Relationship

Convergence Roadmap

2000 VoIP Convergence

- Toll Bypass

TCO Phase

2002 Converged Applications

- PC Soft phones and VPN
- Unified Messaging
- Web User Interface to Applications

Personal
Productivity
Phase

2004 Collaborative Applications

- SIP Team Working Applications
- SIP Presence and Mobility
- Multimedia Contact Centre

Organisational
Productivity
Phase

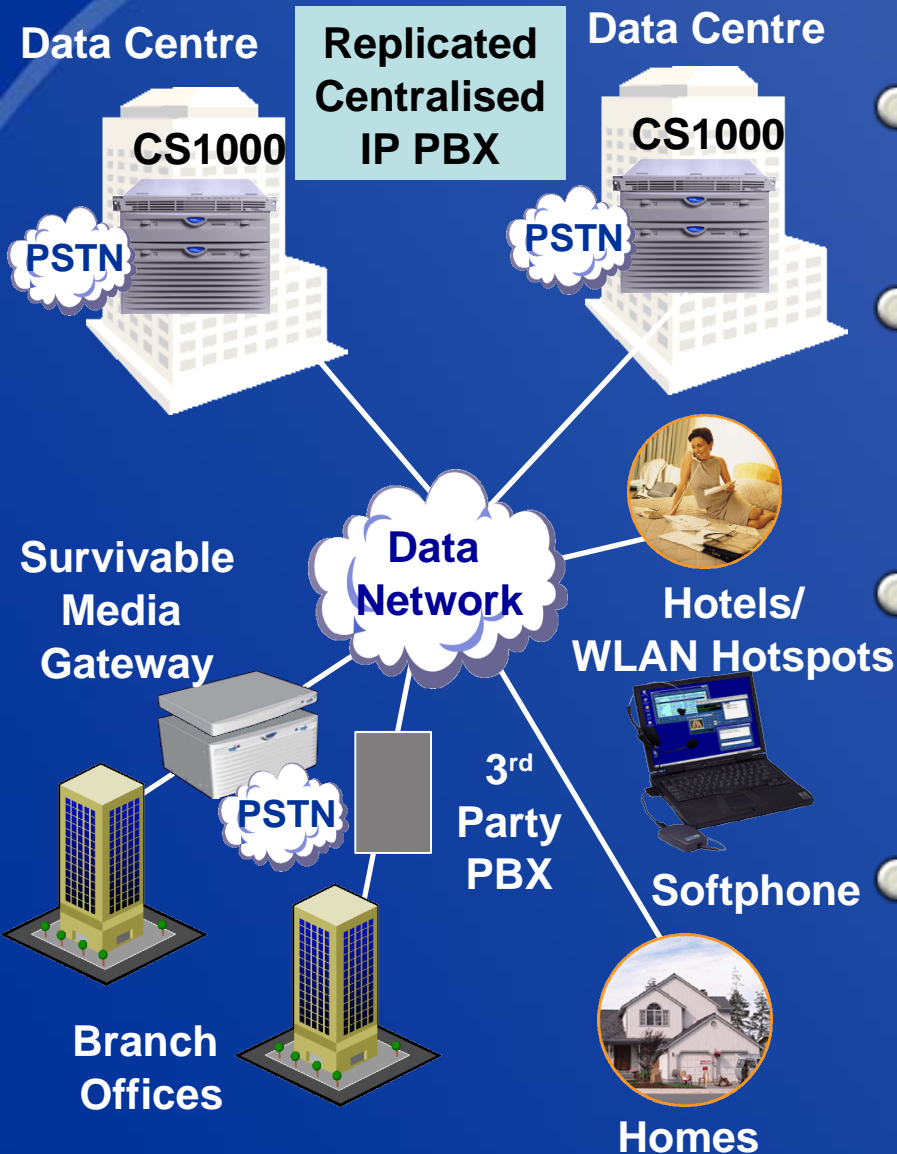

2005 Engaged Applications

- SIP Applications extended beyond the enterprise
- Automated Multimedia Self Service

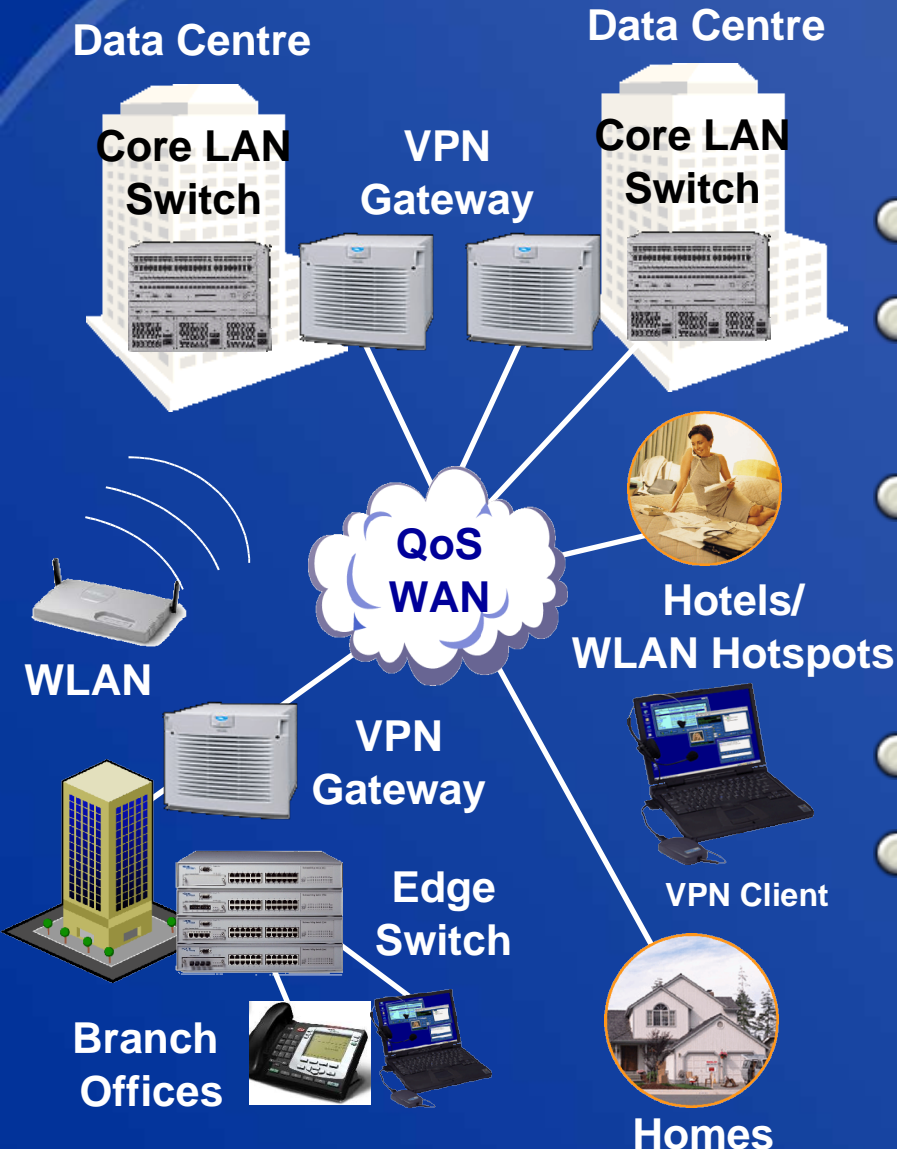

Market
Productivity
Phase

IP PBX Enables The Virtual Enterprise

- Centralised deployment
- Easy integration into business applications
- Simplified network design = lower capex and opex
- Flexible deployment options -enterprise or carrier hosted

Building the Converged Network

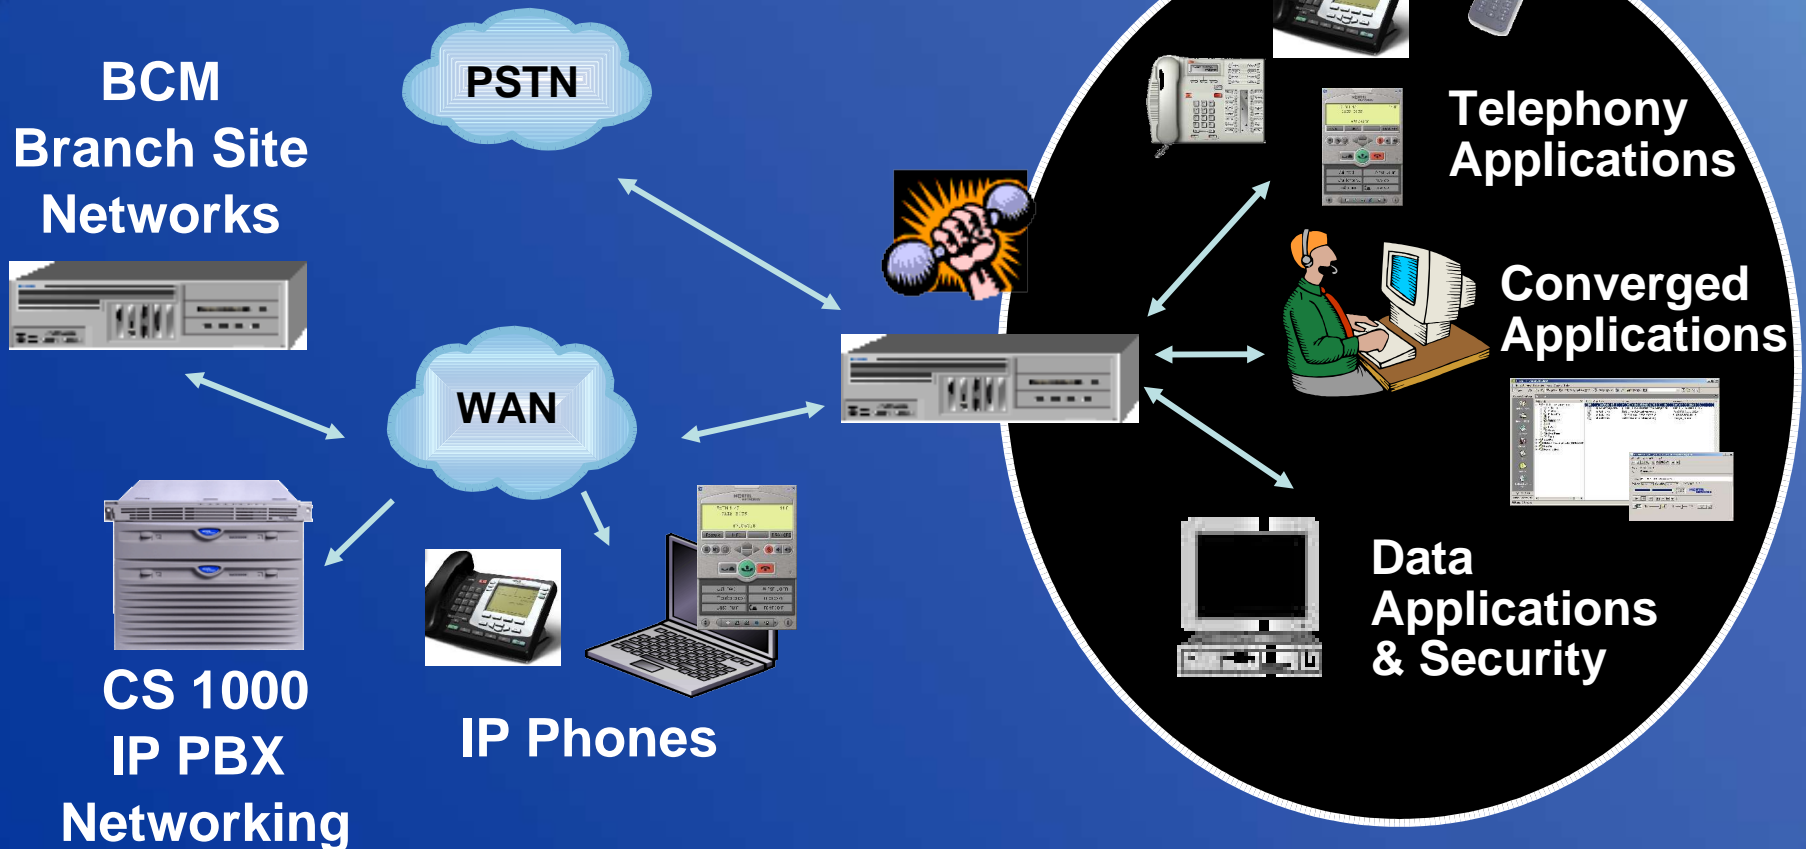

- Simple 2 tier data network
- Sub second recovery times from network link failure
- Survivable, stackable edge switches – Gigabit, Power over Ethernet
- End to end QoS
- Secure VPN connections

Simplifying Smaller Office Networks

The DTI

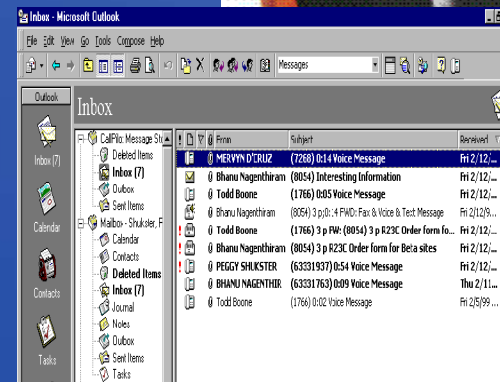

- Solution Overview
 - Largest campus IPT project in Africa
 - 2400 IP phones
 - POE with HA Core
 - 7 Buildings
 - 9 Companies
 - End-2-End Nortel Networks
 - Fully Converged – Unified Desktop

Unified Messaging Flexibility Boosts Productivity

NORTEL
NETWORKS
BUSINESS WITHOUT BOUNDARIES

- Access voice/fax/e-mail messages from
 - Any PC using Web client
 - My CallPilot web interface
 - Your Portable PC
 - Voice / Fax Inbox is integrated into e-mail client
 - Same interface as e-mail client
 - Your Mobile phone
 - Speech commands to handle messages while driving
 - Email by phone to listen to emails
 - Remote notification of messages
 - Visual messages on your IP phone

Converged Desktop Applications

NORTEL
NETWORKS
BUSINESS WITHOUT BOUNDARIES

6. Whiteboard to share ideas

7. Instant File Transfer to complete task there and then

1. Presence indication of colleague's availability reduces telephone tag

2. Instant Messaging for fast answers to easy questions

5. Web Push & Co-Browsing to point to information on the web

4. Video for enhanced communication

3. Telephony when discussion is required

From Hotels
From Airports

What is SIP?

- SIP is a text-based protocol, similar to HTTP and SMTP, for initiating interactive communication sessions between users
 - Application-layer signaling protocol for creating, modifying and terminating media sessions with one or more participants
 - Independent of transport-layer protocol
 - Internet telephone calls, audio/video/data conferences, multimedia etc.
 - Supports user location, user capabilities determination, user availability determination, call setup, and call handling
- Defined by:
 - RFC 2543 (SIP: Session Initiation Protocol)
 - Revised as RFC 3261
- Part of the overall IETF multimedia data & control architecture

What is SIP?

Text Book:

Session Initiation Protocol (SIP) is a text-based signaling protocol, for initiating interactive communication sessions between users. Such sessions include voice, video, chat, interactive games, and virtual reality.

Nortel Networks:

SIP-driven converged communications connects users over any device, utilizing individual preferences to eliminate access barriers, and provide real-time network and application awareness that improve productivity and streamline business processes.

The SIP Advantage = Speed Up Communications

Flexible Telephony Deployment: Pure IP, Hybrid, TDM with migration to IP

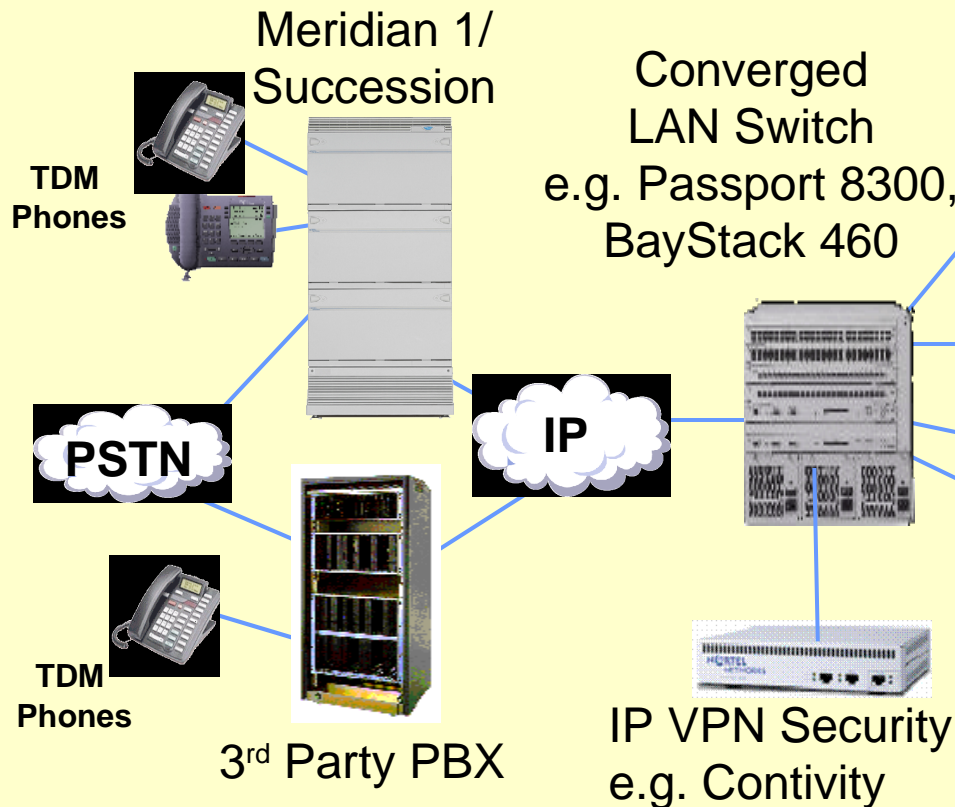

NORTEL
NETWORKS
BUSINESS WITHOUT BOUNDARIES

- Customer choice (TDM, IP, Applications) with Easy Migration Path from Meridian 1 TDM to CS 1000 IP PBX

Integrating IP Solutions

Evolve existing PBX/data infrastructure

Add IP Services

Introducing MCS 5100

NORTEL
NETWORKS
BUSINESS WITHOUT BOUNDARIES

Solution sets:

- Team working: Multimedia collaboration/conferencing
- Mobility “Office Anywhere”
- Desktop productivity
- Custom applications

Attributes

- Open standards based
 - Leverage 3rd party products and integrate into PBX/data networks
- Carrier heritage – ultimate reliability/scalability

Built in Java

**Commercial
Server
Platforms**

**Multimedia
Engaged
Business
Applications**

**Nortel Networks heritage
brings ultimate reliability**

MCS 5100

Integration with any PBX

Link PBX to MCS 5100 using
SIP / H323 / QSig gateway
And phone / MCS client simultaneous ringing

there are

50 million

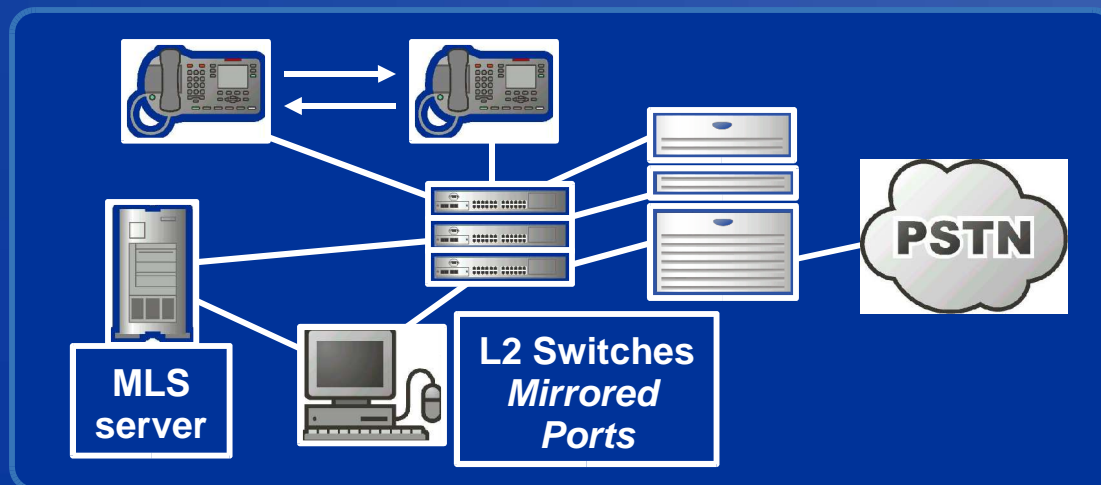

reasons to choose Nortel Networks for your

converged network

- 50 million enterprise telephony lines
- 50 million Ethernet switching ports
- 50 million VPN clients
- 50 million SAN Mbps-miles

IP Call Recording

- Provides interfaces to allow call recording for IP clients
- Permits customers to maintain their existing call recording vendors by providing mechanisms for vendors to access IP voice streams (e.g., via MLS)
- Solution comprises 2 components:
 - New messages in signaling to identify callers with IP addresses (i.e., call recording vendors can correlate the user with IP address of its associated IP Device)
 - Changes to the Unistim specification to provide duplicate voice streams to call recording servers
- Supports G711, G729A and G729AB

IP Phone Enhancements

i2004/02 Phase II IP Phones

- **Integrated Power Over LAN**
 - IEEE 802.3af, Legacy PoL, Cisco proprietary
- **Full VLAN Support**
- **Support accessories (e.g. i24 KEM)**
- **Three colors: Charcoal, Ethergray, Silver bezel**

i24 Key Expansion Module

- **Expands the number of keys that may be configured on the i2002 and i2004 IP Phones**
- **Two columns of 12 Keys (24 keys) with a 10 character LCD display to facilitate self labeled keys**
- **Extensible to 48 keys (cascade 2 i24 KEM's together or add a shifted page of keys to one module)**

New colour display IP phone (Q1 05)

Converged Desktop Application Combines CS 1000 Business Telephony with MCS 5100 Multimedia Applications

NORTEL
NETWORKS
BUSINESS WITHOUT BOUNDARIES

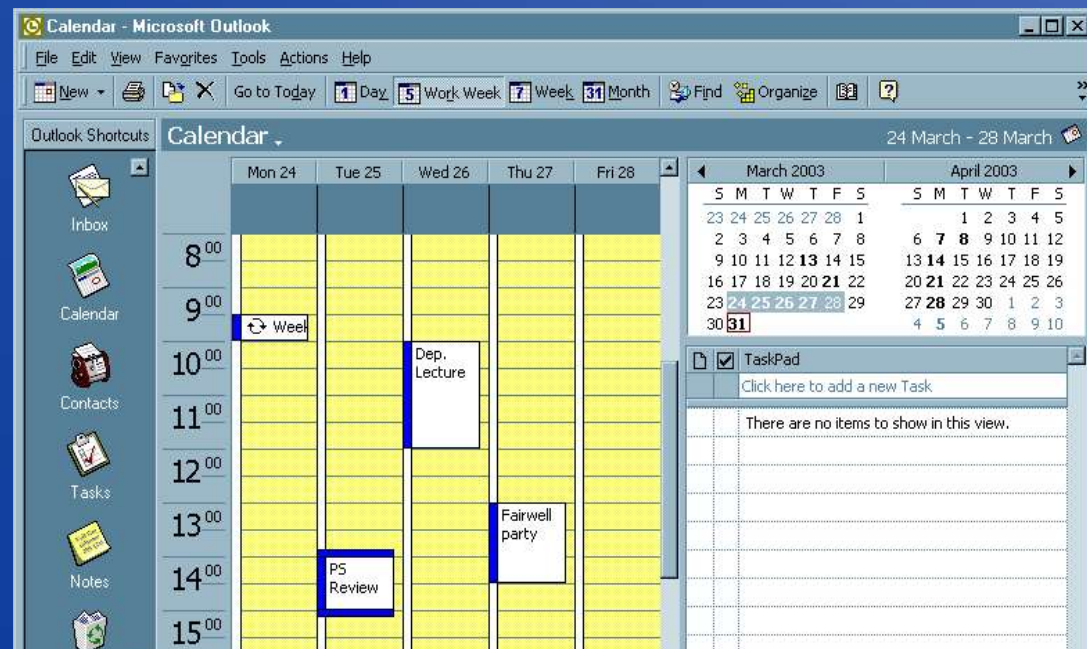

- Users benefit from being able to keep existing desk phone for telephony and adding MCS as overlay service
- Avoids end user retraining for phone
- Retain investment in Telephony infrastructure and evolve users to IP phones overtime

Single user, single experience
Coordinated business telephony/multimedia
Existing Telephony & full multimedia features

Scheduling Changes with ICB Release 4.0

- Regular MS Calendar interface for changing meeting times and automatically reconfiguring bridge ports:
 - Modify time and/or date by dragging the meeting item with the mouse
 - Modify duration by dragging down the bottom edge
 - Delete by selecting the item and pressing “Delete” button

Software Release Subscription (SRS)

What is it? Overview

- **Contracted services offering entitling customers to annual minor and major software releases**
- **Guaranteed like-for-like fixed per user pricing for the term of the contract**
 - Additional users will be charged for incrementally
 - Additional features and capabilities beyond “like-for-like” sold separately
- **Hardware upgrades & maintenance are not included**

The “Evergreen” of Software...

Software Release Subscription (SRS)

- Customer Value
 - Lower Total Cost of Ownership
 - Protect Network Value
 - Level Purchase Plan
 - Like-for-like SW upgrades at today's prices
- Peace of Mind
 - Maintain most current operating software
 - Keep pace with competitors by taking advantage of new enhancements
- Better Planning
 - Enables long-term migration planning
 - Provides budget planning forecast

The background of the slide is a solid blue color. It features several white, curved lines that sweep across the frame, creating a sense of motion and connectivity. In the lower right quadrant, there are three overlapping circular shapes. The leftmost circle contains a blue-tinted image of a complex network structure, possibly a data center or a fiber-optic network. The middle and right circles are partially obscured and contain lighter, less distinct images. The text 'NORTEL NETWORKS' is prominently displayed in the upper left, with 'NORTEL' in a larger font than 'NETWORKS'. The 'O' in 'NORTEL' is stylized with a white circular element. Below the company name, the tagline 'BUSINESS WITHOUT BOUNDARIES' is written in a smaller, all-caps font.
